

Play value

Our Platform House with fitted interior furnishing simply invites children to engage in different types of role-playing games. Installed in sand, the hoist with revolving crane also makes additional activities possible. Children are able to give free reign to fantasy-full games that mirror the grown-up world of work. It also promotes communication and coordination.

Fundamental characteristics

- Child-oriented dimensions according to ergonomic requirements
- Natural wooden surface which appeals to the senses
- Constructional advantage: strong planking of the platform creates large, „support-free“ play space underneath the platform
- Compact playground with a small footprint, suitable when space is at stake
- Combination for role-playing games, „work“ play and activity
- Movement: climbing, sliding, crawling, crouching, using physical strength
