

# Instructions for wear checks of play equipment

The equipment must be checked for correct operation and safety, especially the points listed below:

Proof of maintenance

Playground.....

Date of installation .....

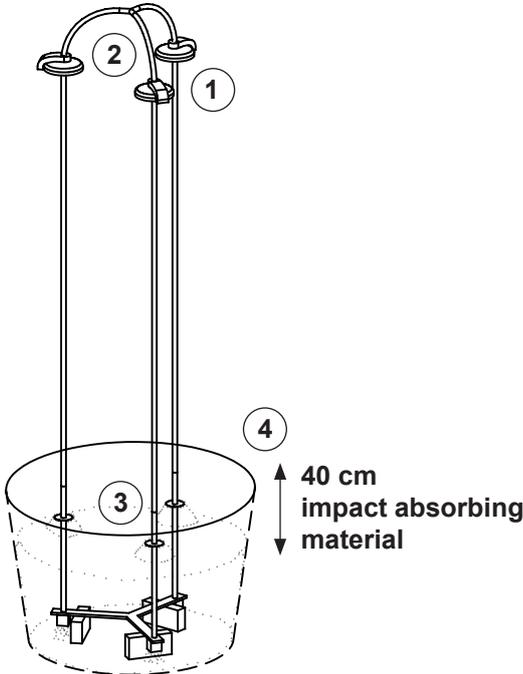

Checks depend on the type of equipment. Any equipment with moving parts must be checked at least twice a year, static equipment at least once a year.

Intervals for maintenance work and checks generally depend on

- the location
- the usage
- the frequency of use
- possible vandalism

For more details see also "General instructions for maintenance of playgrounds".

## Bell Climbing Poles Order No. 7.90000

### Bolts and screws

1. Check the bells and the tongue brackets. If necessary, re-tighten the safety nuts (smooth bolt end).

### Climbing poles

2. Once a year check the welds of the joint at the top for cracks.

### Structural stability

3. Once a year inspect the load bearing parts for corrosion – uncover the foundation to do this. Rock the poles and check lower parts of the poles for cracks.

**Note**

Since the equipment is anchored elastically it may swing vertically during the inspection.

4. Check the thickness of the impact absorbing material. Refill if layer is less than 40 cm thick (preferably with wood chips).

Special notes, e.g. for repairs

Repair not carried out, it is still possible to play on equipment

Repair not carried out, equipment is taken out of action

All work carried out, everything is in order

Maintenance carried out by:

..... Date .....
