

Order No. 5.41020 Flow Table, old version

**Play value**

It is always easier to understand physical phenomena when one can observe it in real life. The experience is particularly intense when the result can be achieved by doing it one's self. This table, with its adjustable barriers forming obstacles to the flowing water, allows such an experience. Pictures of water currents flowing at different speeds become recognisable, as do whirls, whirlpools and meanders. When sand or gravel is added, one can watch the formation of islands or counter-currents. A special cognitive learning process is then afforded to children to aid their understanding. This is however not absolutely vital for being able to enjoy this instructive game.

**Fundamental characteristics**

- Easy handling
- Sturdy construction
- Differently shaped flow obstacles made of rubber for experiencing flow phenomena
- Incentive for playing: flow obstacles
